

ANANTHU M A

MERN STACK DEVELOPER

 +91 9539 272 385 |  Email |  Portfolio |  GitHub |  LinkedIn |  LeetCode

PROFILE SUMMARY

Skilled MERN stack developer with a strong ability to build scalable web applications and robust back-ends using **Node.js**, **Express.js**, and **Next.js**. Expertise in creating dynamic user interfaces with **React.js**, coupled with a problem-solving mindset and keen attention to detail. Thrive in collaborative environments, demonstrate quick adaptability to new technologies, and consistently deliver high-quality solutions.

WORK EXPERIENCE

Full Stack Developer - Freelance

2023 – Present

- Completed an intensive 28-week MERN stack development program at BROTOTYPE, with progress regularly reviewed by industry experts.
- Gained extensive hands-on experience in full-stack development, dedicating 12-16 hours daily to coding, debugging, and project implementation.
- Developed two major projects and several mini projects from scratch, including one completed within 1.5 months, demonstrating strong time management and ability to meet deadlines.
- Built dynamic, responsive web applications using **Next.js**, **React.js**, **Node.js**, **Express.js**, and **MongoDB**, incorporating authentication, REST APIs, and secure payment integrations.
- Strengthened problem-solving and self-learning abilities, staying current with the latest web development trends and technologies.
- Collaborated with mentors and peers to review code, optimize performance, and improve application scalability.

PROJECTS

Wanderlust - Hotel And Restaurant Booking Platform

[Visit Live Website](#)

[Visit GitHub Repo](#)

- A sophisticated platform designed to streamline hotel bookings, featuring an intuitive chatbot system for making hotel and restaurant reservations.
- Includes a comprehensive admin panel for overseeing user activities, managing bookings, and monitoring payment transactions.
- Users can easily search for hotels based on location, availability, and preferences.
- The platform offers a chatbot that guides users through the booking process, providing instant responses and assisting with reservations.
- Prioritizes user security with robust authentication and secure payment methods.
- Users and service providers can engage in real-time communication, facilitating instant updates on reservations.
- The platform is deployed in a scalable environment, ensuring high availability, fast performance, and reliability.
- Technologies: **Express.js**, **MongoDB**, **React.js**, **React Chatbotify**

Refix Garage - Service Center Management System

[Visit Live Website](#) [Visit GitHub Repo](#)

- A comprehensive service center management platform for smartphones, designed to streamline service tracking, billing, and analytics.
- Includes an intuitive admin panel for managing customer services, monitoring service requests, and generating invoices.
- Tracks all service orders with real-time status updates, enabling better workflow management and customer communication.
- Features dynamic dashboards with analytics using **Chart.js** for performance tracking and insights.
- Implements responsive and user-friendly interfaces using **Next.js** and **Tailwind CSS**.
- Backend built with **MongoDB**, supporting secure data handling and efficient storage.
- Deployed in a scalable environment ensuring reliability, fast performance, and easy maintenance.
- Technologies: **Next.js**, **MongoDB**, **Tailwind CSS**, **Chart.js**

Personal Portfolio

[Visit Live Website](#) [Visit GitHub Repo](#)

- A dynamic and interactive personal portfolio showcasing skills, projects, and professional journey.
- Features fluid animations and interactive icons, enhancing user engagement.
- Sleek, modern design highlighting key information clearly.
- Built with robust, type-safe code ensuring reliability.
- Technologies: **Next.js**, **React.js**, **Tailwind CSS**, **Framer Motion**

Confidently - Practice Interview Platform

[Visit GitHub Repo](#)

- A web platform for practicing interviews, allowing users to book slots, manage profiles, and engage in real-time interview sessions.
- Includes an admin panel for managing users, tracking bookings, and monitoring platform usage.
- Real-time communication features powered by **Socket.IO**, enabling live interactions between interviewers and candidates.
- Implements responsive and user-friendly interfaces using **Next.js** and **Tailwind CSS**.
- Backend built with **Next.js** and **MongoDB**, ensuring secure data management and scalable architecture.
- Supports seamless scheduling of interview slots with automated notifications and reminders.
- Deployed in a robust environment for high performance, reliability, and easy maintenance.
- Technologies: **Next.js**, **Nest.js**, **MongoDB**, **Tailwind CSS**, **Socket.IO**

Smart Depot - E-Commerce Application

[Visit GitHub Repo](#)

- An e-commerce platform for smartphone service engineers and trainers, providing a convenient marketplace for repair tools and spare parts.
- Tailored shopping experience with smooth navigation and clear structure.
- Integrates a secure payment gateway with multiple payment options.
- Dynamically renders product information for real-time accuracy.
- Deployed in a robust cloud environment, ensuring high reliability and scalability.
- Technologies: **Next.js**

MINI PROJECTS

README Generator

[Visit Live Website](#) [Visit GitHub Repo](#)

- Generates professional GitHub README files with AI-powered integration.
- Helps developers quickly create structured, customizable, and visually appealing documentation.
- Technologies: **Next.js**, **TypeScript**, **Tailwind CSS**, **Gemini AI**

Password Generator Online

- Users can generate secure passwords tailored to specific requirements including length and complexity.
- Generates and stores strong, customizable passwords.
- Technologies: **React.js**, **Tailwind CSS**, **Node.js**, **Express.js**, **Bcrypt.js**, **MongoDB**, **TypeScript**

[Visit GitHub Repo](#)

Netflix Clone

- Automatically fetches updated content from a reliable external source for seamless user experience.
- Efficient data handling ensures fast content display.
- Technologies: **React.js**, **CSS**, **Axios**, **TMDB API**

TECHNICAL SKILLS

Full-Stack Development:	MERN, Next.js
Front-End Development:	React.js, JavaScript, Tailwind CSS, Bootstrap, HTML, EJS, CSS, TypeScript
Back-End Development:	Node.js, Express.js, REST-API
Database:	MongoDB, PostgreSQL, Mongoose
Architecture:	CLEAN, MVC
Integrations:	Razorpay, Stripe, Firebase, JWT, Google OAuth 2.0, Multer, Socket.IO, Google Places API, React Chatbotify, Chart.js
Prototyping tools:	Figma
Version Control:	Git, GitHub
API Tools:	Postman, Thunder Client
Cloud Services:	EC2, S3, IAM, Route 53
Familiar with:	Redux, Redux Toolkit, Vercel, Render, Netlify, Hostinger, AWS, Axios, Nodemailer, Nginx, Framer Motion

EDUCATION

Year	Degree / Course	Score / CGPA
2023 – 2024	MERN Stack Development, Brototype, Calicut	-
2013 – 2016	Diploma in Electronics Engineering, Board of Technical Education, Government of Kerala	7.52 CGPA
2011 – 2013	Plus Two in Computer Science, Board of Vocational Higher Secondary Education, Government of Kerala	80%
